DETAILED ACTION

Inventorship

1. In view of the papers filed on 12/29/03, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by adding Inventor Alexander V. Suvorov.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Reason for allowance

2. The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests a method for forming an ohmic contact to silicon carbide for a semiconductor device, the method comprising: the epitaxial layer is grown on the surface of the silicon carbide substrate after the implanted phosphorus has been annealed and on the surface of the silicon carbide substrate that is opposite to the implanted surface then the last step is the deposition of the metal layer on the implanted surface of the annealed silicon carbide to thus form the ohmic contact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
